

A day's work across the team, automated to minutes.

We take the slow processes your people share and get AI doing them in minutes, so the time goes on growing the business. Compliant with your organisation's data and AI policies.

HOW IT WORKS

1

A 20-minute call

Who's involved, which process is slow, and whether there's a fit. By phone or video.

20 minutes

Book at opposable.ai/teams

2

The starter package

Calls with the people involved to agree the scope, check it against your policies and measure the process now. You get a written plan and a fixed-price proposal.

From £1,000 + VAT

Through your procurement; paid before it starts.

3

The work itself

Training, automation, or both. One to one, at each person's own desk, on their own work.

Fixed price

As agreed in the proposal.

Start small, prove the case. We get a few people working efficiently with AI first, rather than attempt change across the whole organisation at once. It's easier to control, stays inside a safe, ring-fenced scope, and proves the benefit with real numbers before anyone commits to more.

EXAMPLES

A few people, two processes

£3,000 – £5,000

Training 3 people and automating 2 processes: about 20 staff hours a week saved

A day's work in two minutes

£10,000 – £15,000

An app turning a day-long process into a button press and a review

Regular support

£22,000 – £25,000

One day a week over six months, across a team

An in-house secure AI server

£8,000 – £60,000

AI on your own hardware, for data that must never leave the building

All + VAT. Examples, not a price list: every package is quoted against your plan, at a fixed price, before work starts.

ENSURING COMPLIANCE

Where your data is processed. We recommend Claude for most work. If data must stay in the UK, it can run in your own cloud account in a UK region, Microsoft 365 Copilot keeps it in your tenant, or AI can run on your own hardware. Agreed in writing first.

Using it safely. Everyone learns the risks, such as hidden instructions in an email. It drafts; people send. Accounts and data stay yours.

BUYING FROM US

Purchase orders, NDAs and tailored contracts. We work to your procurement process. Each stage is paid before it begins, by bank transfer or card.
